Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES NO

5/10/05
 PM

We have developed disclosure statements to provide you greater information about what specific information concerning water rights, permits, contracts and authorizations we have available. They include: (1) Statement of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Application for Water in California.

Statements of Water Diversions and Use must be filed by preparer and pre-1914 appropriate Water users as set forth in Water Code section 5100 with specific exemptions from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate title is required for use of water on non-irrigated land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by irrigation water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water from the stream to irrigate his land. Riparian land must be in the same watershed as the water source and must never be used from the stream to take and use water from another source. Riparian rights are limited to the use of water for the benefit of the riparian landowner.

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>".

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Application of Water in California.

Proposes a new application upstream from their division, and (3) assists the State to determine if additional water is available for future purposes of water rights. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone with specific exceptions. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

An appropriative right is a surplus not needed by riparian water users. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

A riparian watershed is an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream watershed. A riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Separation of the riparian right to the severed parcel the sources of supply by an intervening parcel without the same watershed as the water source and must never have been served from the sources of supply by an intervening parcel without a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream watershed. A riparian right to the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream watershed.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.
